LinkedIn: linkedin.com/in/luis-rodriguez-515858bb | Portfolio: luisrodriguezdev.netlify.app | GitHub: github.com/luisangelrod

Skills

Frontend: React 19, TypeScript, Angular, Ionic 8, Vite, TailwindCSS 4, TanStack Query, Zustand, Zod, i18next
Backend: .NET 10, C#, ASP.NET Core, Entity Framework Core, Node.js, REST APIs, Minimal APIs, SQL Server, Azure SQL
Cloud & DevOps: Azure (App Service, SQL, Static Web Apps, Key Vault), GitHub Actions, GitLab CI/CD, Azure DevOps, Bicep IaC, AWS
Mobile/Desktop: Ionic + Capacitor (iOS/Android), WPF + WebView2 (Kiosk), Progressive Web Apps
AI Tooling: Claude Code, ChatGPT/Codex, Gemini, Grok, NotebookLM, CLAUDE.md context engineering, AI code review pipelines
Testing: Vitest, Playwright E2E, Jest, Cypress | Security: JWT, RBAC, PCI DSS, WCAG 2.1 AA

Experience

BCPOS — Remote / Bayamon, PR September 2025 – Present
Systems Architect & AI-Augmented Engineering Lead

- Promoted from mid-level to systems architect within 3 months; sole technical decision-maker across 50+ active projects
- Designed AI-directed development workflow (CLAUDE.md, 7-phase plans, automated reviews), increasing delivery velocity 6x — from 9 to 54 commits/month
- Shipped 4 production systems in 6 months as sole engineer, each from database schema to cloud deployment

Enterprise Payment Kiosk System (BerriosPay)

- Architected full-stack payment platform in 3 days: React 19 frontend, .NET 10 backend, WPF kiosk shell, Azure SQL — deployed across 25+ kiosks
- Engineered SHA256 idempotency with Polly circuit breakers, ensuring zero duplicate transactions across high-volume kiosks
- Built offline queue with auto-sync recovery, enabling kiosks to operate during network outages
- Resolved 11 security vulnerabilities in one audit cycle; maintained 43 automated tests with zero failures

Medical Transport Logistics Platform (GoFleetCare + CDD-HUB)

- Architected two HIPAA-adjacent driver portals with real-time trip management, geofencing, and signature capture
- Designed 13-state status flow with rate limiting (2s debounce, 10/min cap), eliminating status race conditions
- Shipped CDD-HUB from first commit to production PWA with 215 automated tests in 3.5 weeks
- Built offline mutation queue ensuring trip updates survive connectivity loss and sync automatically

Retail POS & Distribution Systems (50+ Projects)

- Maintained 50+ retail POS integrations across payment gateways (Evertec, Cayan, DynaPay), pharmacy systems, and BigCommerce
- Built tablet Ionic/Capacitor POS (Salud Medica) with native hardware integration (Star Micronics printer, cash drawer)

Highspring Digital — Remote March 2025 – August 2025
Frontend Engineer

- Built and optimized Angular/TypeScript web applications in Agile sprints across multiple client engagements
- Improved page load performance by 30% through lazy-loading and state management optimization
- Delivered responsive, WCAG-accessible designs, reducing client-reported UI defects

Dept. of Health of Puerto Rico — Remote, PR 2022 – March 2025
Software Developer

- Developed Angular features for public health platforms serving PR healthcare infrastructure
- Implemented JWT authentication and RBAC for HIPAA-adjacent security compliance
- Automated epidemiological reporting with SQL Server, reducing manual data processing time

Require Technology — Remote, PR 2022 – 2023
QA Associate / Software Developer

- Built React frontend components with reusable hooks and modern component patterns
- Led Cypress-to-Playwright migration, improving cross-browser test stability and reducing E2E execution time

Truenorth Corporation — Remote, PR 2021 – 2022
Software Developer I

- Developed .NET backend modules and SQL Server integrations for government-facing digital platforms
- Implemented automated deployment pipelines using Azure DevOps, reducing manual release steps

Education

University of Puerto Rico — Associate's Degree, Computer Science 2023 – 2025

Projects ↗

BerriosPay — Full-stack payment kiosk: React 19, .NET 10, WPF, Azure SQL. 25+ kiosks, zero duplicate txns, PCI DSS compliant

GoFleetCare — HIPAA-adjacent medical transport: React, Firebase, WebSocket. 13-state status flow, offline sync, 215 tests

CDD-HUB — Operations portal shipped in 3.5 weeks with 215 automated tests (Vitest + Playwright E2E)

Salud Medica — Ionic/Capacitor tablet POS with Star Micronics printer and cash drawer for Android

AI-Directed Dev — Published methodology: CLAUDE.md, 7-phase plans, AI review pipelines. 6x velocity increase measured over 6 months

Interests

AI-Augmented Engineering, Payment Systems Architecture, Open Source, Puerto Rico Tech Community
