LinkedIn: linkedin.com/in/luis-rodriguez-515858bb | Portfolio: luisrodriguezdev.netlify.app | GitHub: github.com/luisangelrod

Skills

Frontend: React 19, TypeScript, Angular, Ionic 8, Vite, TailwindCSS 4, TanStack Query, Zustand, Zod, i18next
Backend: .NET 10, C#, ASP.NET Core, Entity Framework Core, Node.js, REST APIs, Minimal APIs, SQL Server, Azure SQL
Cloud & DevOps: Azure (App Service, SQL, Static Web Apps, Key Vault), GitHub Actions, GitLab CI/CD, Azure DevOps, Bicep IaC, AWS
Mobile/Desktop: Ionic + Capacitor (iOS/Android), WPF + WebView2 (Kiosk), Progressive Web Apps
Testing: Vitest, Playwright E2E, Jest, Cypress | Security: JWT, RBAC, PCI DSS, WCAG 2.1 AA
Tools: VS Code, Git, Postman, Figma, Jira, Azure Data Studio, Serilog, Claude Code, GitHub Copilot

Experience

BCPOS — Remote / Bayamon, PR September 2025 – Present
Senior Full-Stack Engineer & Technical Lead

- Promoted from mid-level to technical lead within 3 months; sole engineer and decision-maker across 50+ active projects
- Shipped 4 production systems in 6 months as sole engineer, each from database schema to cloud deployment
- Deliver at team-level velocity as an individual contributor, covering architecture, frontend, backend, QA, and DevOps

Enterprise Payment Kiosk System (BerriosPay)

- Architected full-stack payment platform: React 19 frontend, .NET 10 backend with clean architecture, WPF kiosk shell, Azure SQL — deployed across 25+ kiosks
- Designed semi-integrated POS flow using PAX POSLink, decoupling PCI-sensitive card data to minimize audit scope (PCI DSS SAQ A)
- Engineered SHA256 idempotency with Polly circuit breakers, retry, and bulkhead isolation — zero duplicate transactions across high-volume kiosks
- Built offline queue with auto-sync recovery, enabling kiosks to operate during network outages
- Resolved 11 security vulnerabilities in one audit cycle; maintained 43 automated tests with zero failures

Medical Transport Logistics Platform (GoFleetCare + CDD-HUB)

- Architected two HIPAA-adjacent driver portals with real-time trip management, geofencing, signature capture, and push notifications
- Designed 13-state status flow with rate limiting (2s debounce, 10/min cap), eliminating status race conditions
- Shipped CDD-HUB from first commit to production PWA with 215 automated tests in 3.5 weeks
- Built offline mutation queue ensuring trip updates survive connectivity loss and sync automatically

Retail POS & Distribution Systems (50+ Projects)

- Maintained 50+ retail POS integrations across payment gateways (Evertec, Cayan, DynaPay), pharmacy systems, and BigCommerce
- Built tablet Ionic/Capacitor POS (Salud Medica) with native hardware integration (Star Micronics printer, cash drawer)

Highspring Digital — Remote (Contract) March 2025 – August 2025
Frontend Engineer

- Built and optimized Angular/TypeScript web applications in Agile sprints across multiple client engagements
- Improved page load performance by 30% through lazy-loading and state management optimization
- Delivered responsive, WCAG-accessible designs, reducing client-reported UI defects

Dept. of Health of Puerto Rico — Remote, PR 2022 – March 2025
Software Developer

- Developed Angular features for public health platforms serving PR healthcare infrastructure
- Implemented JWT authentication and RBAC for HIPAA-adjacent security compliance
- Automated epidemiological reporting with SQL Server, reducing manual data processing time

Contract Engagements — Remote, PR 2021 – 2023
Software Developer

- Require Technology (2022–2023): Built React frontend components; led Cypress-to-Playwright migration, improving cross-browser test stability
- Truenorth Corporation (2021–2022): Developed .NET backend modules and SQL Server integrations for government platforms; automated deployment pipelines via Azure DevOps

Education

University of Puerto Rico — Associate's Degree, Computer Science 2023 – 2025

Supplemented by 5+ years of professional software engineering across enterprise, government, and healthcare systems

Projects ↗

AI QA Agent — Agentic accessibility/SEO/performance testing tool. Next.js 15, Claude API tool_use, SSE streaming — ai-qa-agent.vercel.app

Agent Orchestra — Multi-agent AI pipeline (5 agents: Planner→Researcher→Writer→Critic→Editor). Next.js 15, Claude API, SSE

Dep Scanner — Dependency health scanner with 6 data sources and composite scoring — dep-scanner.vercel.app

BerriosPay — Full-stack payment kiosk: React 19, .NET 10, WPF, Azure SQL. 25+ kiosks, zero duplicate txns, PCI DSS compliant

GoFleetCare — HIPAA-adjacent medical transport: React, Firebase, WebSocket. 13-state status flow, offline sync, 215 tests

CDD-HUB — Operations portal shipped in 3.5 weeks with 215 automated tests (Vitest + Playwright E2E)

Interests

Distributed Systems, Payment Architecture, Developer Tooling, Open Source, Puerto Rico Tech Community
